REPORT OF ACTIVITY
COMPULSORY FIELD STUDY AT SHYAM PARK, SHYAMBAZAR
DEPARTMENT OF ENVIRONMENTAL STUDIES/SCIENCE
MAHARANI KASISWARI COLLEGE

ACTIVITY: Biodiversity documentation and quantification

COURSE: Semester-2 of B. A ,B.Sc (Major) & B.A , B.Sc (Minor) having Environmental Science as Interdisciplinary Course (ENV-IDC)

STUDY AREA: Shyam park, Shyambazar, Kolkata, West Bengal

DATE OF FIELD VISIT: 05.07.2024

NUMBER OF STUDENTS: 77

NUMBER OF FCULTY MEMBERS: 02

NUMBER OF NON-TEACHING STAFFS: 02

OBJECTIVE:

1. To identify different plant species of Shyam Park.
2. To study frequency, density, Shannon Weiner index etc of plant diversity of Shyam Park.

SUMMARY:

The Department of Environmental studies/science organized a field visit for the students of second semester as a part of their Interdisciplinary Course (IDC) in Environmental Science (ENV-IDC-Pr) on 5th July,2024 at Shyam Park, Shyambazar.

Shyam Park is well planted with several plants, most of them are trees and shrubs like guava tree, curry tree, mango, neem, ashoka tree, coconut tree, common jasmine, china rose etc. Students were directed to meet at the college premises on the scheduled time. Then they were led to the location along with the faculty members and non-teaching staffs. They were divided into small groups and allowed to study the variety and the numbers of plant species at a specific area. They tried to identify the plant species by their structure of leaf and canopy. Faculty members and local people also helped them to identify the correct one. Later they prepared a field report and submitted on scheduled date.

OUTCOME:

As a part of curriculum most of the students of second semester have attended the field-based study and prepared the report. Students get enough opportunity to interact with the faculty members to study different plant species. Students get more accustomed with nature as they gathered knowledge on different utility of different plant species.

CONCLUSION:

On behalf of the Department of Environmental Studies/Science, we would like to extend our gratitude to the Principal, Dr Sima Chakrabarti, for granting us the permission and support for the field-based study. We especially like to express our profound gratitude to other faculty members and non-teaching staffs of Maharani Kasiswari College for their support and encouragement which made this field trip possible. The students were made aware of the surrounding biodiversity and importance of the environment. As a whole, this field study benefited the students greatly.

REPORT SUBMITTED BY:

Smt. Paushali Guha (Sarkar),
Faculty of the Department of Environmental Studies/Science,
Maharani Kasiswari college
